

REDE INOVAR

THE PORTUGUESE AGRO, FOOD AND FOREST INNOVATION NETWORK

Sponsored by:

What is it?

Portuguese innovation network based on Technology and Knowledge Transfer in agriculture, food and forest sectors, so that innovative ideas can be moved from research labs to real world business projects

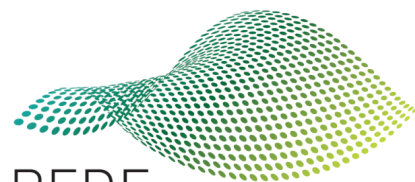

Main Goals

- Technology valorization
- Promote and strengthen bonds between Scientific and Technological Institutions (STI) and enterprises through technology transfer, innovation and entrepreneurship
- Build communication channels to support technology transfer activities
- Develop strategic orientations and policies for agriculture, food and forest sectors
- Encourage Business Competitiveness

Structure

REDE INOVAR is organized in four **Chains**:

- **Fruit, Horticultural Products and Flowers:** Fruit culture, fruit and processed fruit products; horticulture, horticulture products and processed horticulture products; flower production and flowers
- **Olive oil:** olive culture, olive, olive oil and other olive processed products
- **Wine:** vitiviniculture and enology
- **Forest:** products and forest services, processes of efficiency increase in logistics, production, transport, transformation and commercialization of forest products

REDE
INOVAR

Project Partners

- **Coordinator:**

- Agro-Industry integration

- Fruits, Vegetables and Flowers

- Olive oil

- Wine

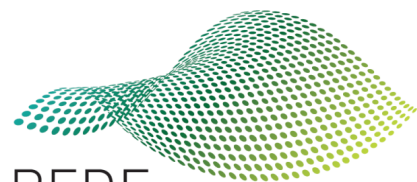

- Forest

- **Associations:**

- **STI:**

REDE
INOVAR

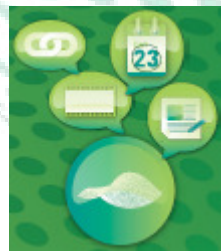

Web Platform

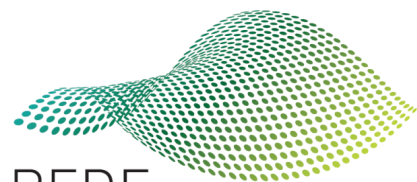

Objective:

Social networking platform that increases Technology and Innovation Transfer within agriculture, food and forest sectors.

Operationalization:

- **Profile:**
 - Personal
 - Professional
 - Brokerage
- Information management based on **digital contents**
 - **Active** (on-line research)
 - **Passive** (based on users interests and activities within the web platform)
- **Qualified services** (Brokerage encounters, event management ...)

REDE INOVAR - WHO ARE WE?

REDE INOVAR is a national wide network with the ability to provide a exciting knowledge transfer environment between the academic and enterprise areas. It works Forest, Agricultural and agrofood sectors.

REDE INOVAR is structured in the following areas:

azeite: Olive, Olive Oil and other Olive based products

vinho: Wine and Enology

floresta: Forest products and services. Production, exploring, transport, transform and commerce.

horto frutícolas: Fruits, flowers and derived products

REDE INOVAR is made by the following partners:

inouva: Project coordinator

u. é. é. v. o. r. a: National scientific and technological system entities:

utad

CATÓLICA

COTIN: Sector coordinator entities

fipa: Agro-Industrial coordination

REDE INOVAR Platform: Beta Version

Limited access to partners

REDE INOVAR Platform is in it's final stage of development. We are counting on you to help us to improve the platform. In all pages a feedback button is available (down-right corner) for you to share your ideas and difficulties. Thank you for your help.

MY BROKERAGE PROFILES

Brokerage - Technology to Business

WHAT IS IT?

The Technology To Business area (T2B) has the goal to strengthen the relations between academic groups and the enterprise organizations. It will speed up in a fast, easy, direct and accessible way the technology transfer and the promotion of partnership projects on the agricultural, food and forest sectors.

HOW DOES IT WORK?

- 1- Each REDE INOVAR user can have 1 or more T2B profiles having 3 types of interests:
 - 1- Technologic offer/Technology Competence
 - 2- Technology need
 - 3- networking
- 2- Every time a new tech profile is created it can be available for others as a complementary profile
- 3- Based on the profiles available, each user can select those which is interested in and schedule a meeting.
- 4- The meeting schedule can be made in 2 ways:
 - presencial meeting (in T2B events running on the moment)
 - virtual meeting via skype

Azeite Faia Brava

Na rede complexa do biótopo da Reserva da Faia Brava, o olival e o amendoal são espécies características e fulcrais para a manutenção do mosaico agro-florestal e da biodiversidade. Através da manutenção destes pomares tradicionais é garantida também uma diversidade interessante de espécies vegetais e uma disponibilidade de frutos maduros na época fria, garantindo assim disponibilidade alimentar para a fauna frugívora. A ATN possui aproximadamente 20 ha de olival e amendoal tradicional, a maioria dos quais tinham já sido abandonados, por se encontrarem em zonas afastadas das aldeias, em terrenos íngremes e difíceis de trabalhar.
